Katsina State:	NERDC State Office, Education Resource Centre's/ERC/Building, Muhammad Dikko Road, Opposite Katsina College, Katsina/KCK/Katsina, Katsina State.

Foreword

One of the targets set out by the Federal Government of Nigeria under the current dispensation is the eradication of the menace of out-of-school children that has bedeviled the country since the past three decades. This target area of concern formed one of the 10 pillars of the Ministerial Strategic Plan (2016 - 2019) which have metamorphosed into the Ministerial Strategic Plan (2018 - 2022). The effort asserted in this direction, is in line with the Constitution of the Federal Republic of Nigeria, which recognizes education as a fundamental right of every child, irrespective of ethnic background, social-economic status, religious affiliation and family background.

One of our turnaround strategies, as outlined in the Ministerial Strategic Plan, is to create opportunities for the education of all children and youths, who for one reason or the other, are out of school. These children, who are found in many parts of Nigeria, constitute about 5% of the world's population of Out-of-School children.

The turnaround strategies were based on identified gaps and challenges in the education sector. One obvious gap identified was the lack of well-thought educational programmes that specifically addresses the peculiarities of overage children who are not in school. The Accelerated Basic Education Programme (ABEP) is therefore a step taken towards filling the identified gap. Aside from addressing our domestic situation, the programme is in line with global best practices.

The specific goal of the Programme is to mop-up (or reduce to the barest minimum) and bring back to school the large number of overage and out-of-

school children who are disadvantaged, marginalized and affected by crises, disasters or other socio-economic factors.

I am therefore pleased to note that the Nigerian Educational Research and Development Council (NERDC) has taken this step towards the provision of the curriculum to drive the AEP programme. I congratulate NERDC and her partners for successfully completing the development of the Accelerated Basic Education Curriculum for the Implementation of the Accelerated Basic Education Programme in Nigeria. I wish to particularly thank Plan International and Save the Children International for supporting the development of the curriculum under the European Union funded project: The EU Response, Early Recovery and Resilience in Borno State: Education Component. I also acknowledge the contributions of all experts who worked hard in the development of the curriculum. The curriculum is flexible and provides learning options and pathways for learners.

It is therefore my pleasure to present the curricula to all Nigerians and our foreign partners for the education of out-of-school children under the accelerated education programme.

My utmost hope is that the effective use of the curricula will bring about our desired aim of providing quality basic education to all Nigerian children irrespective of the circumstances surrounding their existence.

ADAMU ADAMU

Honourable Minister of Education, FME, Abuja.

October 2019

Preface

Nigeria, in the recent past, has been rated as one of the countries in the world with a huge population of out-of-school children and youths. The situation became worsened by the escalation of insurgency in the northeast leading to closure of many schools and the displacement of huge number persons including children and adolescents. Credible sources have it that many schools in the northeast states were closed from November 2014 to June 2015. By August 2017, an estimated 57% of schools were still closed in Borno.

Although many of the schools have been reopened, a high percentage of children are yet to return to school due to poverty and other socio-economic factors. There are also pockets of attack, psychosocial factors that affect human instability including where to start education again, having been out of school for many years (up to 10 years, in some instances).

Further, in the recent times, there have been widespread happenings, across the country, that have led to long term disruption of the educational pursuits of children and youths. These children and youths, in most instances, are either overage to continue schooling from where they stopped or are overage to start schooling from the foundation class (Primary 1). Incidentally, this group of children are found in many parts of the country.

Addressing this situation required the articulation of a special form of educational programme that will meet the peculiar circumstance of these children in this category. Whereas pockets of efforts have been made towards addressing the challenge, Nigeria lacks a strategically designed educational programme and curriculum standards that suits the peculiarities of children in

this category. Understandably, some non-governmental organizations have attempted to provide some interventions in this regard but these they had been done without a nationally established framework and curriculum standards.

Importantly, the Ministerial Strategy Plan (2018- 2022) had clearly identified containing the menace of out-of-school children as one of the 10 pillars of the programmes targeted at bringing about change the Nigerian education sector.

The above scenario informed the need for the development of a national accelerated education curriculum with the overarching objective of providing a catchup educational programme suitable for the educational needs of out-of-school children, and in the process mainstream them to formal school programme or provide them with alternative career path through enrolment into vocational training centres, after completing basic education. The intention to develop the curriculum arose also because of the need to provide a national curriculum standard that can be used in all states of Nigeria, where there are such peculiarities.

The Nigeria Accelerated Education Programme (NAEP) specifically targets out-of-school children between ages 10 and 18 who were in school but had their education interrupted and are overage to continue schooling from where they stopped and; those who have never been to school and are overage to start formal education from the foundation class (Primary 1).

The NAEP is structured into 3 Levels as exemplified below:

- Level 1 (Stage 1 -3) to cover the curriculum contents of Primary 1 – 3
- Level 2 (Stages 1 -3) to cover the curriculum contents of Primary 4 – 6

- Level 3 (Stages 1 – 3) to cover the curriculum contents of JS 1 -3.

Each level will run for one academic year of 3 terms, similar to the regular school programme but with a flexible timetable in learner-friendly centres. The structure is further explained in the table below:

Level	Target group
Level 1	<ul style="list-style-type: none"> • Those who have never been to school aged 10 and above
Level 2	<ul style="list-style-type: none"> • Those who have been to school up to primary 2 or 3 but dropped out due to one reason or the other.
Level 3	<ul style="list-style-type: none"> • Those who have been to school up to primary 5 or 6 but dropped out due to one reason or the other.

Five subjects were selected for the implementation of the programme. These are: English Studies, Mathematics, Basic Science and Technology, Nigerian History and Values and one Nigerian Language (Hausa, Igbo and Yoruba, in the interim).

The development of the Accelerated Basic Education Curriculum involved a systematic procedure in which the 9-Year Basic Education Curriculum (for the selected subjects) was condensed into a 3-Year accelerated basic education curriculum without compromising the quality.

NERDC's four-stage approach to curriculum development was adopted in the process. These are:

- i. Planning, which involves concepts and strategy formulation;
- ii. Writing (crafting) of the initial draft of the curriculum document;
- iii. Critique of the draft curriculum document; and
- iv. Editorial and finalization of the curriculum document.

Teacher's Guide, with detailed and well sequenced contents, instructional strategies and assessment procedures is also developed to strengthen teachers' capabilities to effectively teach the curriculum.

It is my delight to acknowledge the role played by Plan International and Save the Children International in the development of the curriculum under the European Union funded project: The EU Response, Early Recovery and Resilience in Borno State: Education Component.

My appreciation also goes to all our resource persons for their efforts, expertise and commitment to the success of the project. It is my deepest conviction that the use of this curriculum will be of immense benefit to the nation in the bid to addressing the problem of out-of-school children in Nigeria.

PROF. ISMAIL JUNAIDU
Executive Secretary, NERDC

Introduction

The Accelerated Basic Education Programme (ABEP) is a catchup education programme meant to take care of the educational needs of overage children and youths between the age 10 and 18 who for certain reasons could not enroll into regular school or had their educational programmes interrupted. The Philosophy for ABEP, like the overall philosophy of Nigeria education; is to develop the individual into a sound and effective citizen and the provision of equal opportunities for the acquisition of appropriate levels of literacy, numeracy, manipulative, communicative and life-skills; as well as the ethical, moral, security and civic values needed for laying a solid foundation for life-long learning. On a more specific note, the ABEP is designed to mop-up (or reduce to the barest minimum) and bring back to school the large number of out-of-school children spread across many parts of Nigeria. The programme targets two categories of these children. These are:

- Children and youths whose education programme were interrupted and are overage to continue schooling from where they stopped.
- Children and youths who have never been to school and are overage to start formal education from the foundation class (Primary 1).

The ABEP, which is unique in all its ramifications, is to be implemented in 3-Levels comprising:

- Level 1 equivalent of Primary 1 - 3
- Level 2 equivalent of Primary 4 - 6
- Level 3 equivalent of JS 1- 3

In each of these levels, learners are expected to acquire basic education

competencies equivalent to their mates in the regular school programme.

Given the uniqueness of the programme, it became imperative to redesign and condense the 9-Basic Education Curriculum in such a manner as to meet the peculiarities and needs of the intended beneficiaries of ABEP without compromising quality. Thus, the Accelerated Basic Education Curriculum (ABEC) is developed to provide the recipients unique learning experiences that will enable them to acquire basic knowledge, skills and competencies sufficient for mainstreaming and coping with the curriculum contents in the formal school system.

The Mathematics Curriculum for ABEP is developed to offer the recipients the opportunity to:

1. acquire demonstrable mathematical abilities comparable to their mates in the regular school programme;
2. develop basic constructional and computation skills applicable to their daily living;
3. cultivate the understanding and application of mathematical operations, signs and symbols in everyday life;
4. build a strong foundation in mathematics for future studies;

The thematic approach was adopted in the selection of the contents and learning experiences in the curriculum. These contents are organized under 5 themes at each Level as shown in the table below:

Level	Theme	
1	Number and Numeration	The curriculum has been further scoped and sequenced into lesson topics for ease of implementation at the ABEP learning centres. Since English Studies is a fundamental subject for lifelong learning, 5 hours every week is to be dedicated to the teaching and learning of the curriculum contents. This means that, out of the 4 hours daily learning period for the ABEP, 1 hour shall be used for the teaching and learning of English Studies.
	Basic Operation	
	Mensuration and Geometry	
	Algebraic Process	
	Everyday Statistics	
2	Number and Numeration	Teacher's Guide has also been developed to further support the effective implementation of the curriculum by both teachers and policy makers. It is therefore recommended that the curriculum be implemented with due reference to the teacher's guide. Finally, it is envisaged that education managers, teachers, Development Partners and other stakeholders will provide the necessary infrastructure and support required for the actualization of the objectives of the curriculum.
	Basic Operation	
	Mensuration and Geometry	
	Algebraic Operations	
	Everyday Statistics	
3	Number and Numeration	
	Basic Operation	
	Mensuration and Geometry	
	Algebraic Operations	
	Everyday Statistics	

Dr. Garba D. Gand
Director, Curriculum Development Centre, NERDC

TABLE OF CONTENTS

Class	Themes	Topics	Page
Stage 1	Number and Numeration	<ul style="list-style-type: none"> • Whole Numbers • LCM and HCF • Counting in Base 2 • Conversion of Base 10 to Binary numbers and Vice versa • Fractions • Rational and Non-Rational Numbers 	1-4
	Basic Operation	<ul style="list-style-type: none"> • Addition and Subtraction of whole numbers • Multiplication and Division • Estimates 	5-11
Stage 2	Basic Operation	<ul style="list-style-type: none"> • Approximation • Transaction at home and offices 	12-14
	Mensuration and Geometry	<ul style="list-style-type: none"> • Plane Shapes • Three Dimensional Shapes • Construction • Angles • Bearing • Similar Shapes • Trigonometry 	15-22
	Algebraic Process	<ul style="list-style-type: none"> • Use of symbol • Simplification of algebraic expression 	23-24
Stage 3	Algebraic Process	<ul style="list-style-type: none"> • Simple Equation • Simple equation involving fractions • Graph • Simultaneous Linea Equation 	25-27
List of Participants			31-32

			TEACHER	LEARNERS		
3. COUNTING IN BASE 2	Learners should be able to count in groups of twos leading to series or progression.	Count in groups of twos	Guides Learners to count in groups of twos, e.g. 2,4,6,8,10,12...	Count in groups of twos	Counters, e.g. bottle tops counting, sticks, etc.	Learners to count in groups of twos.
4. CONVERSION OF BASE 10 TO BINARY NUMBERS AND VICE VERSA	Learners should be able to convert base 10 numbers to binary numbers and vice versa	Conversion of base 10 numbers to base 2 and vice versa.	Converts 1-50 to base 2 e.g. Convert 12_{10} to base 2. $ \begin{array}{r} 2 \mid 12 \\ 2 \mid 6 \text{ r } 0 \\ 2 \mid 3 \text{ r } 0 \\ 2 \mid 1 \text{ r } 1 \\ \hline \end{array} $ i.e. $12_{10} = 1100_2$	Convert base 10 numbers to base 2 and vice versa	1. charts, 2. counters such as match sticks, broom sticks, bottle tops.	Learners to convert base 10 numbers to base 2 and vice versa.
1. FRACTIONS	Learners should be able to: 1. convert fractions to decimals and vice versa; 2. convert fractions to percentages and vice versa; 3. express fractions as ratio, decimals and percentages	1. Conversion of fractions to decimals and vice-versa 2. Conversion of fractions to percentages and vice versa. 3. Expression of fractions as ratio, decimals and percentages.	Guides learners to: 1. convert fractions to decimals and vice-versa 2. convert fractions to percentages and vice versa. 3. Express fractions as ratio, decimals and percentages e.g. $\frac{1}{2}=1:2=0.5=50\%$	1. Convert fractions to decimals and vice-versa 2. Convert fractions to percentages and vice versa. 3. express fractions as ratio, decimals and percentages	1 Charts with problems on conversion of fractions to decimals and vice-versa. 2 Charts on conversion of percentages to fraction and vice-versa. 3 Fraction Charts. 4 Percentage Charts 5 Decimals Charts.	Learners to: 1. solve problems conversion of fractions to decimals and vice-versa; 2. solve problems conversion of fractions to percentages and vice versa; 3. express fractions as ratio, decimals and

			TEACHER	LEARNERS		
1. Approximation	Learners should be able to: 1. approximate sum and differences; 2. approximate product and quotient; 3. round numbers to the nearest 1000 and 10,000; 4. approximate number to places of decimals and significant figures.	1. Approximating values in adding and subtracting numbers 2. Approximating results of multiplication and division 3. Rounding off numbers to the nearest 1000 and 10000 4. Approximating number to the required decimal places and significant figures 5. Square and square root tables 6. Charts, records and schedule 7. Quantitative reasoning	Guides learners to: 1. approximate numbers to be added first and the add same for subtraction 2. organise the learners into 2 groups, one group will approximate numbers, the other group will multiply the original numbers, leads and guide them to compare the two results. 3. demonstrate how to approximate numbers to appropriate numbers to nearest 1000 and 10000 4. Demonstrate how to appropriate number of certain places of decimal and significant figures	1. Approximate numbers to the nearest whole then added or subtract. 2. One group approximate given numbers, and then multiply The other multiply the given number without approximating. Learners should find the differences in the two results. 3. Approximate numbers to the nearest 1000 and 10000	<ul style="list-style-type: none"> Number Charts showing addition, subtraction, multiplication and division of numbers. Square table and square root table schedules. 	Learners to: 1. find the approximate sum of $273 + 607$; 2. find the approximate differences of $485 - 348$; 3. what is the approximate result of 142×382 ; 4. approximate to the nearest 1000 (a) 4947 (b) 9845; 5. find the value of the following: (i) 23^2 (ii) $\sqrt{400}$.

Guide learners to collect ungrouped data e.g. Data about their respective age in the class or a demographic data presented by the teacher and find its: <ol style="list-style-type: none"> a. Mode b. Median c. Mean 2. Guide learners to identify that in any ungrouped data, Mean is the average, Mode is number with the highest occurrences, while median is the middle number when data are arranged in ascending or descending order 2. Leads learners to solve quantitative reasoning problems such as 	<ol style="list-style-type: none"> 1. calculate the: <ol style="list-style-type: none"> a. Mean b. Mode and c. Median of a demographic data presented to them by the teacher 	Data chats	<p>Learners to:</p> <ol style="list-style-type: none"> 1. calculate: <ol style="list-style-type: none"> a. Mode b. Median c. Mean 2 apply measure of central tendencies to analyze any given information 3. Solve quantitative reasoning problem involving <ol style="list-style-type: none"> a. Mode b. Median c. Mean

ACCELERATED BASIC EDUCATION CURRICULUM (MATHEMATICS)

THEME 2: EVERYDAY STATISTICS

LEVEL THREE

STAGE THREE

TOPIC	PERFORMANCE OBJECTIVES	CONTENT	ACTIVITIES		TEACHING AND LEARNING RESOURCES	EVALUATION GUIDE
			TEACHER	LEARNERS		
2. Probability	Learners should be able to: 1. Explain the occurrence of chance events in everyday life 2. Determine the probability of certain events	1. Occurrence of chance events in everyday life 2. Probability of chance events	<ol style="list-style-type: none"> Leads learners to give examples of events of chances in everyday life e.g chances or event that rain will fall in January Leads learners to toss a coin or roll a die Guides learners calculate the probability that the tossed coin will be "head or tail" or that a particular number will appear while rolling a die Guide learners to link statistical data with the use of probability such as Mortality rate etc. 	<ol style="list-style-type: none"> Give examples of chance of events in everyday life Participate in tossing a coin or rolling a dice Calculate the probability that the tossed coin could be "head or tail" or that a particular number will appear while rolling a dice 	<ul style="list-style-type: none"> Coin Dice Information sheet or event 	Learners to: 1. Give 4 examples of occurrences of chance events in everyday life 2. Calculate the probability events

Participants List

Project Coordinating Team			
S/NO	NAME	Role	Institution
1.	Professor Ismail Junaidu	Project Coordinator	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja
2	Dr. Garba Dahiru Gandu	Project Manager	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja
3	Dr. Chima Jonas Egbujuo	Project Technical Facilitator	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja

Mathematics Curriculum Technical Team		
S/N	Name	Institution
1	Professor Mamma Musa	Ahmadu Bello University, Zaria
2	Dr. Nnaji N. Lambert	Alvan Ikoku Federal College of Education, Owerri
3	Mr. Ibrahim Salaudeen	Nigerian Educational Research and Development Council (NERDC) Model School, Sheda-Abuja
4	Mr. Famade Oladiran	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja
5	Mr. Lawal Ashura	S.U.N.C.A.I.S, Katsina State Ministry of Education
6	Professor Ibrahim Galadima	Usman Danfodio University. Sokoto
7	Dr. Akinsola Olakunle S.	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja
8	Dr. Ighalo Odiagbe	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja
9	Mr. Ibrahim Yahaya El-Ladan	Federal College of Education, Zaria

Plenary Technical Team		
S/N	Name	Institution
1	Professor Kayode Omole	University of Abuja
2	Dr. Eva Kyaagba	Society for Gender and Child Advancement, Abuja
3	Dr. Imaobong Nsehe	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja
4	Dr. Mikailu Ibrahim	FHI 360
5	Dr. Lawani Margaret	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja
6	Professor Ismaila Tsiga	Centre for Reading Research and Development, Bayero University, Kano
7	Dr. Bernie Ikegulu	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja
8	Professor Ahmed Amfani	Usman Danfodio University. Sokoto
9	Mr. Ibrahim Mohammed Gandu	Kano State College of Education, Kano
10	Mr. Salisu Ibrahim	G.G.D.S.S Rafindadi, Katsina State
11	Mr. Babagana Gartimari	Borno SUBEB
12	Mrs. Amina Ibrahim Abubakar	Abubakar Tatari Ali Polytechnic, Bauchi
13	Mr. Almustapha Sambo	Usman Danfodio University. Sokoto
14	Dr. Gloria Ngozi Ugbor	University of Nigeria, Nuskka
15	Dr. Nkechi Adiele	Nigerian Educational Research and Development Council (NERDC). Sheda -Abuja

S/N	Name	Institution
16	Mrs. Okoro-Opara Anthonia	FCT Education Resource Centre, Abuja
17	Dr. Nnabuihe Chigozie Bright	University of Lagos, Lagos
18	Mr. Ogbonna Chidi	Nigerian Educational Research and Development Council (NERDC) Model School, Sheda-Abuja
19	Professor Harrison Adeniyi	Lagos State University, Lagos
20	Dr. Babalola Victoria Olubanwo	Nigerian Educational Research and Development Council (NERDC), Sheda-Abuja
21	Professor Philip Ogundeleji Adetutu	University of Ibadan, Ibadan
22	Dr. Adesuyan Raphael Ayodeji	Adeyemi College of Education, Ondo
23	Mrs. Mary Owoduni	Nigerian Educational Research and Development Council (NERDC) Model School, Sheda-Abuja
24	Dr. Fidelis Egbe	Veritas University, Keffi
25	Dr. Judith Kanu	Nigerian Educational Research and Development Council (NERDC), Sheda-Abuja
26	Professor Garba Sa'ad	Bayero University, Kano
27	Rabiu Garba	Government Junior Secondary School, Garko Dausai, Kano
28	Dr. Mohammed Tukur Usman	FCT College of Education Zuba
29	Dr. Bokolo Mabel	Model Primary School, Yenagoa, Bayelsa
30	Dr. Hassan Musa Gusau	National Commission for Mass Literacy, Adult and Non-formal Education (NMEC) ABUJA
31	Ms. Abiola Sanusi	Riplington Education Initiative (REI), Abuja
32	Womboh i. Michael	Nigerian Educational Research and Development Council (NERDC), Model School, Sheda-Abuja
33	Bello Mushood	FCT College of Education Zuba
34	Habib Ahmed Jibrin	Nigerian Educational Research and Development Council (NERDC), Sheda-Abuja
35	Abdulkadir Yusuf	Government Senior Secondary School, Abukur, Rimi, Katsina
36	Professor M. D. Suleiman	Bayero University, Kano
37	Professor Zephinus Njoku	University of Nigeria, Nsukka
38	Prof. Chinyere Ogbuanya	University of Nigeria, Nsukka
39	Dr. Grace Ajagun	Nigerian Educational Research and Development Council (NERDC), Sheda-Abuja
40	Prof. M. A. Suleiman	Ahmadu Bello University, Zaria
41	Mrs. Hadiza Nasir Wali	Borno State Ministry of Education, Maiduguri
42	Mr. Bala Mari Tatama	National Commission for Mass Literacy, Adult and Non-formal Education (NMEC) ABUJA
43	Dr. Nneji Godfrey	Federal College of Education (Technical), Yaba, Lagos
44	Mr. Nura G. Garba	Medile Primary School Kumbotso, Kano
45	Mr. Lawal Yahaya	Government Senior Secondary School, Dutsinma Katsina
46	Dr. Eleri Nnanna	Nigerian Educational Research and Development Council (NERDC), Sheda-Abuja
47	Mr. Mu'azu Mamuda	Government Secondary School, Kaita, Katsina
48	Dr. David Kolawole Omole	Nigerian Educational Research and Development Council (NERDC), Sheda-Abuja
49	Professor Uzoechi Benneth Coleman	Nasarawa State University, Keffi
50	Mr. Jacob Masanso	Save the Children International, Abuja Office
51	Mr. Onismus Laban	Plan International, Abuja Office
